

Custom Application Development

Full Service Information Technology Solutions

ICG is dedicated to providing tailor-made applications to meet your business needs. For more than 30 years, we have been developing custom software for firms in various industries.

Our experience in product design and system implementation enables us to transform technology into reliable, easy-to-use tools that help companies succeed.

Our programming expertise includes:

- Microsoft SQL database and stored procedures
- Microsoft .NET
- Java, HTML, and XML
- Lotus Notes / Domino development and deployment of workflow (groupware) applications
- Document management and imaging
- Pocket PC (mobile) applications
- RPG ILE and OS/400

ICG recognizes that every business is unique and that rigid off-the-shelf applications are not always adequate. Let us show you how we can design, develop and deploy a custom solution for you.
